Why Choose FMS?

Fleet Management Solutions, Inc. (FMS) provides complete mobile asset tracking and management solutions to the Energy, Military, Government, Construction, Mining and Logistics industries. Solutions include vehicle tracking units, satellite airtime for data transmission, a web-hosted application for complete fleet management and professional services for successful deployment, on-going support, and quick return on investment.

The Two-way Satellite GPS Tracking Advantage

Only GPS fleet tracking systems using satellite communication can provide real-time data from remote and rugged regions, across the globe!

- » Two-way Satellite Communications
- » Remote and Rugged Locations

- » Reliable and Real-Time
- » Global Coverage

FMS takes you beyond simple tracking by providing the information you need to improve the safety, productivity, and profitability of your business.

Feature	Benefit	Business Value
Safety		
Global Tracking	Near Real-Time Alerts	Reduced Liability
Operations		
Efficient Dispatch	Improved Job Performance	Lower Cost Per Project
Fleet Management		
Detect Unauthorized Use	Improved Behavior	Reduced Risk and Fuel Savings

Business Value

FMS systems typically provide return on investment in less than one year and immediately provide value upon installation. Operational savings alone provide cost justification, but asset and driver safety factors are often the key business drivers.

FMS Technical Support & Professional Services

Client satisfaction, results and continuous return on investment begin with quality training and installation support.

FMS works closely with every client to ensure system installation and deployment is complete and on schedule.

With an online knowledge base and truly helpful documentation you may never encounter a problem you can't solve yourself. But if you do, FMS is just a phone call away.

Real-Time Data From Anywhere, Anytime

FMS tracking modules maintain continuous GPS location, direction and speed information and combine that with vehicle performance data for complete mobile resource management. Fleet information is delivered from the vehicle via satellite, ensuring data delivery without need for cell towers and regardless of land geography. Data is received, stored and analyzed at the FMS network operations center and is accessed from the FMS hosted application, Fleet Central.

Oil & Gas

Operations in remote locations and harsh environments require reliable and rugged products that perform when needed.

Government & Military

FMS meets the real-time fleet tracking needs and strict security requirements associated with government and military applications.

Construction & Mining

FMS enables safety and efficiency on the job in construction, mining and remote infrastructure operations anywhere on the globe.

Logistics

FMS specializes in global, continuous tracking coverage for logistics operations in remote and hazardous regions, such as the Middle East and Africa.
